Boost Productivity and Faster, Easier Clean Up

Iron Bull self-dumping material handling hoppers will help you achieve your goal by keeping waste/scrap materials out of your way.

Iron Bull self-dumping material handling hoppers can greatly enhance your productivity and efficiency. Wood, metal and harness shops, machine shops, construction and agricultural operations can benefit tremendously. Use for handling parts in production, storing product and for waste/scrap collection. Load it up and transport it quickly and easily to deposit material where you want it.

Use Iron Bull for:

- Parts in production
- Wood or metal shavings and punch outs
- Scraps at construction sites
- Glass and stone
- Agricultural industry
- Produce farms
- Scraps from shearing operations
- Floor sweepings
- Building trash / junk

Dump without getting up from the driver seat

Efficiency is crucial in today's competitive environment. Our self-dumping hoppers are engineered with maximum ease and efficiency of operation in mind.

Iron Bull's self-dumping hopper **Positive-Alignment-System™** consists of two features that make it both quicker and easier for transport with your forklift.*

Feature 1

The Tapered Slide Box™ for easy up and down fork alignment. This innovative feature allows the forks on the forklift to be misaligned up or down and still enter the hopper base without stopping to adjust the fork height.

Feature 2

The base length channel for positive forklift-to-hopper alignment.

Tapered Slide Box™ for easy forklift fork alignment

The tapered slide box gives more clearance for easier and quicker fork entry.

Forklift-to-hopper alignment feature

(Birds eye view diagram)

Here forklift is misaligned with hopper.

But the Iron Bull forklift-to-hopper alignment feature helps the operator insert the forks more quickly without additional maneuvering.

Hopper aligns with forklift when weight allows.

Taken together these two features not only make it faster but also a more pleasant experience for your forklift operator.

* Standard on all hoppers except the Economy Models.

“We use it for shavings and wood chunks.
If we ever need another, it will be an Iron Bull.
I am impressed with the fork alignment feature.
It really works slick.”

— David Yoder, Willowbrook Sawmill, Oblong IL

“We clean up quicker, we use it everyday”

— Kevin Wittmer, Peace Valley Cabinets, Montgomery IN

Iron Tough and Bull Strong

Iron Bull offers some of the toughest, strongest self-dumping hoppers on the market today. These heavy duty features add up to a hopper that will give you years and years of service.

Wrap around welded lip on back corners increases structural integrity

Standard on all models.

Welded reinforcing angle all along the top edge

Standard on all models.*

Sides of hopper extend down past hopper bottom for added strength

Standard on all models.

Full length channel base for superior strength*

*Not available for economy models.

Base cross tie channel, open face down. Engineered for extra strength as well as preventing build up of debris.

Standard on all models.

Additional welded gusset greatly enhances front corner strength

Standard on all models 1 cu. yd. and larger.*

We take safety seriously

The dual safety lock system (consisting of the hopper retaining chain and the safety flip lock) is standard on all models. Bilingual instruction and safety decals on all models.

Hopper safety retaining chain

When not in transit, the safety chain hooks on the hopper to guard against accidental dumping. When in transit, the safety chain is fastened on the forklift mast keeping the hopper from sliding off when dumping.

Safety flip lock

Hopper cannot accidentally dump when flip lock is engaged.

Bilingual safety labels

All operating instruction and safety decals are in both English and Spanish.

- Options:**
- **Stacking feature** (not on all models)
 - **3 way fork entry** (1/4 to 3 cu yd. only)
 - **1" drainage Hole**
 - **Hopper Floor lock** (for use with casters)
 - **Crane Pick up Eyes**

Paint Color Options:

Iron Bull self-dumping hoppers come standard with a Gray oxide primer. The following colors are available as an option.

Popular options:

Available in steel or phenolic.

Push handle

Added convenience for moving hopper on casters.

Dump From Seat™ latch rope

This latch rope saves the operator from getting off the forklift to dump the hopper.

Open end self-dumping hopper

Designed for handling long materials. Great for lumber, pipe, storm debris, fencing material and bags of salt, cement and fertilizer, etc.

Save on expensive propane!

Custom Made Hoppers

"A huge time saver"
Ernie Wengard
EC Woods Inc, Indiana

Iron Bull can customize any hopper to fit your needs. Left is a customized Iron Bull self-dumping hopper. This dust collecting hopper has an air tight lid and is ideal for small to mid-size woodworking shops.

With much more capacity than your typical bag and added ease of use this system is a big time saver.

A wide range of sizes and capacities. Choose from a space saving 1/3 yd. 24 in. wide hopper up to a 2 1/2 yd. hopper and seven sizes in between.
